

ACDelco

Professional COATED CALIPERS

With Zinc-plated protective coating to enhance corrosion resistance compared to competitive powder coated calipers.

Helping to prevent rust corrosion

Our new coated Professional brake calipers will stand the test of our seasonal weather. These zinc coated calipers enhance corrosion resistance to last longer and look better! And like all ACDelco parts, each part number is engineered to high quality standards to confidently support your brake repair. With all makes coverage – these calipers are the Professional choice!

 **COMPETITIVE WARRANTY**
2 YEARS / 40,000 KM LIMITED WARRANTY†

■ The Advantage of ACDelco Coated Calipers

- Zinc plated coating enhances corrosion resistance to provide the best results when compared to the original coating
- Meets 96 hour salt spray corrosion resistance for Zinc testing standard per ASTM B117*
- Available bracketed where required
- 100% quality tested and pressure tested for leaks
- Design follows critical specifications to ensure safe, leak-free operation
- Pre-lubrication of critical areas prevents binding
- Rust preventative coating provides longer lasting protection from environmental elements such as corrosive road sprays and salt

■ Part number convention

To order your Professional Coated Brake Caliper - be sure to order the part number ending with a C, for example: 18FR#C

ACDelco Professional coated calipers complement ACDelco's existing brake part line-up including ACDelco Professional, Advantage and O.E. brake parts.

DON'T FORGET! **ROADSIDE ASSISTANCE** is available to the customer if the repair is made at an active ACDelco Professional Service Centre (PSC) or ACDelco Automotive Care Expert Program (ACE) Member Facility.

PSC Accounts qualify for the ACDelco Consumer Assurance Labour Reimbursement program.

ACDelco

Quality. It's in our DNA.

†Two years / 40,000 KM (whichever comes first) limited warranty for non-commercial applications. See the customer warranty statement for details.
*The American Society of Testing and Materials (ASTM) test B117 is one of the most widely adopted standards for salt spray testing.
