

# ACDelco Professional OIL FILTERS

ACDelco offers a full line of Professional, premium aftermarket oil filter products. These filters have excellent capacity, consistent flow management, and high durability, providing **exceptional performance and efficiency**. Increased oil flow rates require filters with higher bypass settings. Oil filters made by other manufacturers may have different bypass settings than required by today's GM engines.

ACDelco Professional oil filters fit your customers' maintenance needs, providing a good fit for GM vehicles, as well as a **wide range** of other vehicles on the road today.

## BUILT FOR STRENGTH AND DURABILITY

- **ACDelco's Standard** filters use eDesign core technology. Older classic standard filters use a straight locked perforated steel core design
- **ACDelco's Ultraguard™** filters use spiral wound steel with louvers core design for tough high demanding applications. Ultraguard™ filters may also fit standard filter applications. Check your catalogue for details.
- **Cartridge** filters for select vehicles. These contain only filter media, so only the filter element needs to be replaced during servicing
- All ACDelco's filters are equipped with **Duraguard®** blended media, including cellulose, polyester and mircoglass for optimal efficiency and greater dirt-holding capacity
- Nylon poppet style **bypass valve in rear for today's high flow engines**.

Refer to ACDelco's electronic catalogue for the most up-to-date applications and a complete list of parts.

## eDESIGN CORE TECHNOLOGY

- **+50%** higher collapse strength
- **+10x** more open area in core for improved flow
- **Improved filter cleanliness** increased filter test life
- Meets **GM filter cleanliness requirements**

ACDelco eDesign core

Straight lock perforated core design

**Important:** Engine damage resulting from an incorrect or improperly installed engine oil filter is not a warrantable claim. Oil filter misapplication may cause abnormal engine noise or internal damage. The best way to avoid oil filter quality concerns is to use ACDelco oil filters.

## WARRANTY

**12 MONTH  
20,000 KM**

### 12 Months/20,000 KM PARTS WARRANTY

Replacement parts only. Non-commercial passenger cars and light trucks only. Warranty against defective workmanship only. Other terms and limitations apply. See customer warranty statement and your parts supplier for details.

# ACDelco Professional OIL FILTERS

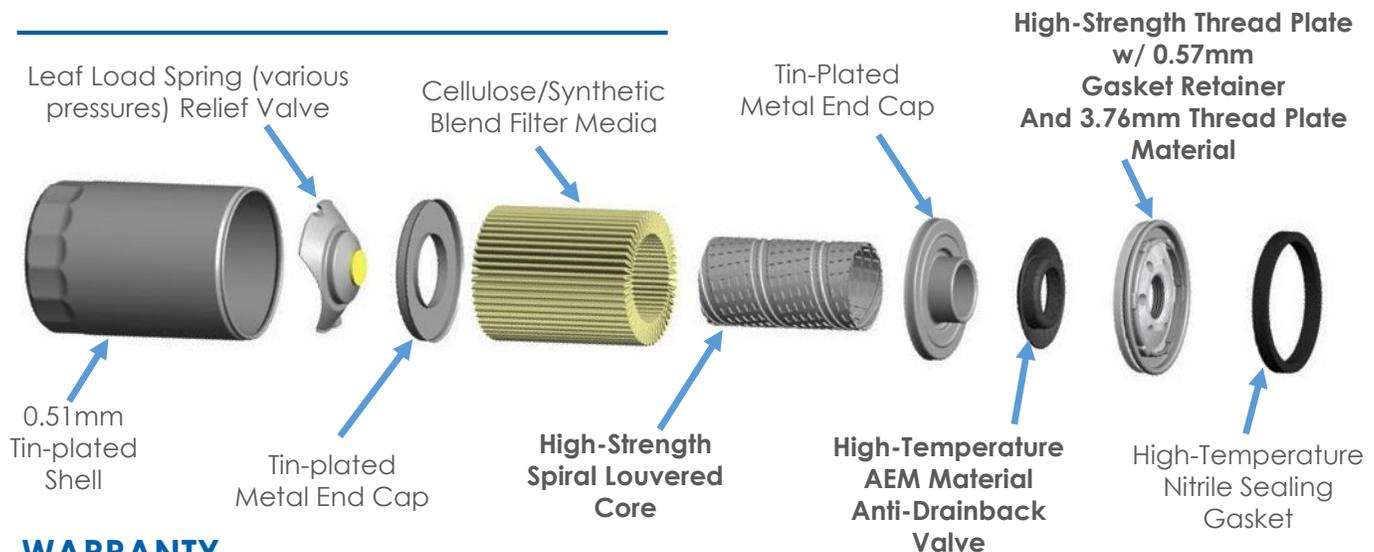

ACDelco Ultraguard™ Oil Filters are designed using filtering technology that helps provide **tight seals and reduced engine wear**. These premium oil filters provide outstanding **protection for demanding uses**. With **98%** multi-pass efficiency at 25-30 microns combined with **increased burst-strength and durability**, the ACDelco Ultraguard™ Oil Filter is the clear choice **when performance matters**.

## ULTRAGUARD™ PREMIUM FILTERS

- **Heavy duty shell material is tested to four (4) times** normal engine oil pressure and helps protect filter from rock impingement.
- **Heavy threaded plate helps protects against pressure spikes eight (8) times** above normal operating pressure.
- **Ethylene Acrylate Rubber (AEM)** premium anti-drainback valve tested to 175C (347F).
- **Heavy duty steel cover supports a high temperature gasket tested to 175C (347F)**.
- **Spiral wound steel core tested to twice the OEM collapse requirement. 30% stronger than “straight locked” core designs.**
- **Poppet style bypass valve (if required) with heat treated spring matching OEM pressure specifications.**
- **Blended media are tested beyond normal change intervals.**
