

## Bearing Line Offering

GOLD

ACDelco Gold bearings are the high-quality alternative to OE parts. These parts are manufactured to meet expectations for fit, form and function making them a smart choice for General Motors vehicles, as well as most makes and models. These high-quality parts are **backed by General Motors**.

(ACDelco Gold formerly appeared as ACDelco Advantage)

ACDELCO HAS BEARING COMPONENTS FOR NEARLY EVERY AUTOMOTIVE MAKE AND MODEL

### BEARING COMPONENTS INCLUDE:

- Ball bearings
- Bearing seals
- Clutch release bearings
- Hanger bearings
- Hub assemblies
- Hub spindle kits
- Taper cone/cup
- Wheel Bearings

### ACDelco Gold bearing components feature:

- The right material, design and operating tolerances that your repair demands.
- Strict engineering and manufacturing standards help ensure ACDelco Gold bearings maximize the performance of related components in the vehicle's ABS, brake and steering systems.
- ACDelco Gold Hub Assemblies are engineered to the highest industry standards and are rigorously tested on certified lab equipment.

# Bearing Components

**GOLD**

## Features

## Benefits

<b>PRECISION CONTROLLED TOLERANCES</b>	Manufactured to precise tolerances	Provides excellent bearing, braking and handling performance
	Rolling surfaces are induction heat treated to a controlled depth	Creates a case-hardened pattern that increases strength and reliability
	Precision ground raceways and super finished balls	Helps ensure a smooth and quiet operation
<b>SUPERIOR STEEL</b>	Components made of high quality ultra low contaminant steel	Smooth and quiet operation and superior bearing performance
	Micro-clean steel contains fewer inclusions than regular bearing steel	Reduces fatigue spalling
<b>BEARING RACES</b>	Heat treated	Heat treated steel is engineered to withstand demanding driving conditions
<b>ADVANCED LUBRICATION</b>	Hub assemblies are “greased for life” using an advanced formulated grease	OE quality bearing grease is engineered to withstand high operating temperatures and loading
<b>PROVEN SEAL DESIGN</b>	Multi-lip design configuration and extreme temperature seal materials	Provides an exceptional barrier to water and contaminants
<b>HIGH STRENGTH STUDS</b>	Utilizes cold headed high tensile strength steel wheel bolts	Studs are manufactured to provide reliable service throughout the life of the bearing
<b>ADVANCED ABS SENSORS</b>	ABS sensors and connectors are made from high strength polymers and insulated heavy gauge wire	Helps ensure correct voltage output and a strong consistent ABS signal
