

Parts and Labor Estimate

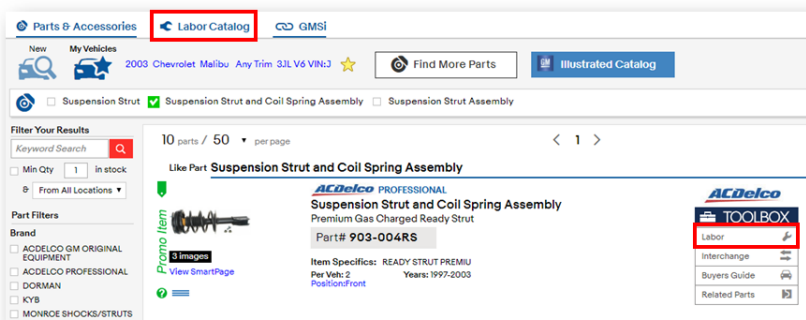

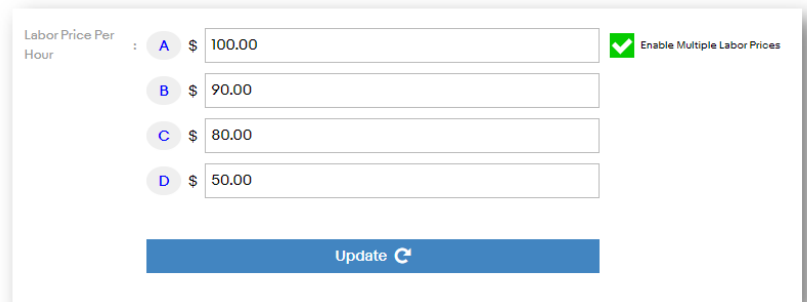

CONNECTION now offers the ability to enter your labor rates to be used in conjunction with the provided Mitchell labor times, to create an estimate for your customer.

Select "MY ACCOUNT" located at the upper right of the CONNECTION tool. You will find "Labor Price Per Hour" in this menu if you hover over it, or you can simply click on "MY ACCOUNT" to open it.

This will open your account page with the option to enter your Labor Price Per Hour.

You can also choose to enter multiple labor rates to coincide with the skill level of the job as determined by Mitchell. These range from "A" Highly Skilled, to "D" Low Skilled.

When you do a parts lookup you can select "Labor Catalog" at the top of the page to see the labor for all part types in your parts lookup, or you can select "Labor" from the "TOOLBOX" to only see the labor for that part type.

This will pull up related labor times and estimated cost for the job. If you don't agree with the labor time provided by Mitchell you can use the "Labor Multiplier" to increase the labor time.

This is also where you will add the labor to the cart to be used in creating the customers parts and labor estimate.
