

NEW Disc Brake Rotors

GOLD**SILVER**

The all new ACDelco Gold and Silver aftermarket brake products are the same high-quality parts you've come to expect from ACDelco, at a lower cost! The new aftermarket brake line has been consolidated which makes finding and ordering the right part easier while taking up less space on the shelf. ACDelco Gold rotors are the high-quality alternative to GM OE parts and ACDelco Silver rotors are the high value option for General Motors vehicles as well as most makes and models, all backed by GM.

PRODUCT FEATURES

GOLD

- **GM OE-Quality Precision** – Manufactured to exact tolerances for proper fit, smooth installation, and braking performance
- **Advanced G3000 Metallurgy** – Premium G3000 iron construction delivers strength, durability, and heat resistance for long-lasting performance
- **Precision Machined Friction Surface** – Fine-machined braking surface promotes smooth, consistent braking performance
- **Superior Corrosion Protection** – Gold rotors feature full GEOMET® coating on all exposed surfaces — a high-performance, water-based, chromium-free finish engineered to provide protection against rust and environmental exposure
- **Salt Spray Tested for Durability** – Exceeds ASTM B117 salt spray testing
- **Reduced Noise & Pulsation** – Thickness variation less than 0.01 mm helps minimize pedal pulsation, reduce brake noise, and extend brake pad life
- **Optimized Surface Flatness** – Surface flatness less than 0.05 mm helps reduce brake pulsation and promote smooth braking performance
- **Enhanced Thermal Crack Resistance** – Engineered to withstand demanding thermal cycling conditions and exceeds 150-cycle brake dynamometer testing associated with SAE J2928
- **Broad Vehicle Coverage** – Available for domestic, Asian, and European passenger cars, SUVs, and light trucks
- **Ready-to-Install Design** – Direct bolt-on replacement with no machining required
- **Backed by ACDelco Warranty** – ACDelco Gold rotors are backed by a 24-month/40,000 km warranty.*

Gold Coated Rotor

PRODUCT FEATURES

SILVER

ACDelco Silver rotors deliver dependable braking performance with the same quality features found in ACDelco Gold rotors except for the features listed below. ACDelco Silver rotors offer a high-value solution for a wide range of vehicle applications.

- **Rust Preventative Protection** – Silver rotors are coated with a rust preventative oil to help protect against corrosion during storage and handling.
- **Cross-Polished Friction Surface** – Cross-polished brake friction surfaces promote smooth and consistent braking performance.
- **Dependable Warranty Coverage** – Backed by a 3 month/5,000 km warranty.*

Silver Uncoated Rotor

Refer to the electronic parts catalogue for the most up-to-date applications and a complete list of parts.

NEW Disc Brake Rotors

GOLD

PRODUCT FEATURES – Performance Rotors

ACDelco Gold Performance Rotors deliver braking performance and thermal durability for demanding driving conditions, including off-road, SUV, truck, and fleet applications.

- **Engineered for Severe-Duty Applications** – Designed to withstand the high temperatures associated with aggressive and heavy-duty braking conditions
- **Advanced G3000 Metallurgy** – Premium G3000 iron construction delivers strength, durability, and heat resistance for severe-duty operation
- **Enhanced Heat Dissipation** – Slotted and drilled design helps dissipate heat quickly for optimal braking performance and thermal stability
- **Precision Thickness Control** – Thickness variation less than 0.01 mm helps minimize pedal pulsation, reduce brake noise, and extend brake pad life
- **Enhanced Thermal Crack Resistance** – Engineered to exceed 150-cycle brake dynamometer thermal cycling testing associated with SAE J2928.

Gold Performance Rotor

PRODUCT FEATURES – Police Rotors

ACDelco Gold Police Rotors are engineered to deliver dependable stopping power and thermal durability for demanding law enforcement and severe-duty applications.

- **Severe-Duty Braking Performance** – Designed to provide the stopping power required for critical police and emergency vehicle applications
- **Police-Specific Cooling Design** – Optimized vane configuration increases surface area and rotor mass to help lower operating temperatures under demanding braking conditions
- **Advanced High-Carbon Metallurgy** – Manufactured with GG15HC high-carbon cast iron for thermal conductivity, crack resistance, noise damping, and reduced distortion under high operating temperatures
- **Precision Thickness Control** – Thickness variation less than 0.01 mm helps minimize pedal pulsation, reduce brake noise, and extend brake pad life

Gold Police Rotor
