FEATURES

Use of coated seals

Housings and impellers use OE designs with regard to specified materials (die cast aluminum, cast iron, or stamped steel depending on application)

Shaft assemblies are heat treated

High quality bearings are permanently sealed and lubricated

Steel hub with clearly visible quality inspection marks

ACDelco logo is etched into every pump

100% of pumps are leak tested

GASKETS are INCLUDED and PACKAGED in a sealed bag and attached to the box

BENEFITS

Seal Longevity

Designed with the same fit, form and function of OE water pumps

Provides superior strength and durability over non treated Assemblies

Greater durability and long life

Proves 100% of ACDelco pumps are inspected for functionality and manufacturing quality

Confirms ACDelco authenticity

Ensures each pump passes ACDelco quality standards

Helps guarantee all parts necessary to complete the job are available to the technician and free of damage
