

***ACDelco* WIPER BLADES**

THE CHOICE IS CLEAR!

PROFESSIONAL WIPER BLADES

Performance Wiper Blade

- OE Service conventional aftermarket blade
- All metal blade made of high strength steel
- Direct-Fit Connector allows for quick and easy installation
- Includes rear integral blades on newer vehicle models

Premium Beam Blade

- Aerofoil provides maximum windshield contact by transferring wind force downward
- Engineered to conform to today's highly curved windshields
- One-piece wiper structure resists snow and ice clogging
- Rubber element fully treated for a smoother, quieter wipe
- Unique spoiler reduces windlift in excess of 135 MPH (220 KPH)
- Provides quiet operation with less chatter
- Easy Connection Technology
- Fits 5 conventional and 6 specialty wiper arm connection types with only one extra adaptor

ADVANTAGE WIPER BLADES

All-Season Metal Wiper Blade

- Universal fit conventional blade
- All metal blade construction
- Riveted superstructure for greater durability
- Dogleg blade design contains better on high wrap vehicles for better wipe quality

Advantage Beam Wiper Blade

- Riveted all metal superstructure
- Universal fit beam blade
- Latest wiper technology economically priced
- Coverage for most vehicles on road today

SPECIALTY BLADES

Conventional Style Winter Blade

- Manufactured with a tough rubber boot and metal superstructure to resist snow and ice clogging
- Blades available to fit popular “pinch-tab” wiper arm applications

Beam Style Winter Blade

- Heavy-gauge wiper element resists tearing in cold temperatures
- Patented surface protector creates a smooth, quiet wipe
- One-click connection system
- One-piece, flexible design that snugly conforms to most windshields
- Low blade profile provides superior performance at high speeds
- Sleek, wedge-shaped spoiler clears away snow and ice

ACDelco vs. Competition

TIERED BRANDING	BLADE TYPE	ACDelco	ANCO	RAINX	TRICO
BETTER	Conventional	Professional Performance	Aerovantage	Weatherbeater	Exact Fit
	Beam	Professional Beam Blades	N/A	N/A	Trico Force
GOOD	Conventional	Advantage All Season Metal	31 Series	N/A	Universal Fit
	Beam	Advantage Beam	Profile	Latitude	N/A
SPECIALTY	Conventional	Conventional Winter Blades	Winter	N/A	Trico Chill
	Beam	Beam Winter Blades	Winter	N/A	Trico Ice

Note: RainX has a hybrid blade called Fusion. ACDelco does not participate in that category.

IT'S TIME TO CHANGE THE BLADES!

It is recommended that you inspect your wipers after six months.

Wiper Blades need to be changed if the following occurs:

- **Streaking:** Blurry vision caused by dry or dirty blades
- **Chattering:** Skipping of the blade caused by the permanent set of a curve in the rubber of old blades
- **Worn Rubber:** Rounded of the wiping edge caused by extended use
- **Split Rubber:** Cracked and split rubber caused by prolong exposure to the sun's ultraviolet rays
- **Bent Wiper Frame:** Bent or broke wiper frames may be caused by ice scrapers or automatic car washers

ACDelco
Quality. It's in our DNA.
