ACDelco
Advantage
FILTERS

HIGH QUALITY. LOW COST.

Keep maintenance repair costs in line.

Our new advantage filter line gives you the fit, form, function and technology of premium aftermarket filters at a more economical price. Built to support the competitive routine maintenance market.

AIR | CABIN AIR | OIL | FUEL | TRANSMISSION

ADVANTAGE AIR FILTERS | PANEL AND RADIAL AIR FILTERS

Provides optimal dirt-holding capacity, filtering efficiency and maximum protection for engines from harmful, airborne contaminants

KEY FEATURES AND BENEFITS

- Engineered to maximize filtration media surface area
- Air filter media provides a linear path allowing for minimal air restriction. Pleats in the media are held together with heat-resistant plastisol, trapping more dirt and providing ultimate durability
- Polyurethane air filters (PU) include a sealing gasket that ensures a proper seal under harsh conditions
- Radial air filters feature a mesh screen on both the inside and outside walls for element strength and media protection from backfire

ADVANTAGE OIL FILTERS ECO (CARTRIDGE-STYLE) AND SPIN-ON

High durability design for exceptional filtering performance

KEY FEATURES AND BENEFITS

- Manufactured with high quality media to optimize performance
- Includes a gasket that stays flexible and tightly sealed
- Heavy duty baseplate, featuring a fully tucked double seam
- Anti-drain back valve withstands extreme temperature fluctuations
- Fitted with stamped end caps that contain a plastisol sealant, with media deeply embedded into sealant
- Includes a steel coil spring, ensuring components are securely held in place, and reinforced with a relief valve
- End-caps contain bypass valves as per Original Equipment requirements
- More even pleating for better finish

ADVANTAGE TRANSMISSION FILTERS

High efficiency and easy to use transmission filter kits, providing long-term protection from harmful contaminants

KEY FEATURES AND BENEFITS

- Designed per Original Equipment specifications
- Filter specifications maintained through extensive testing
- Easy to use kits, includes gaskets, O-rings and components as required by the Original Equipment application
- High quality design features, including sealing gaskets, made from materials specially designed for use with transmission fluids and metal end caps to add extra support for filter media and prevent internal leaks
- High quality transmission filter media traps harmful contaminants, ensuring clean transmission fluid to cool and protect transmission components and sensitive electronics
- Gaskets hold pan bolts in place for easy installation and guarantee a leak-free seal

ADVANTAGE CABIN AIR FILTERS

High efficiency cabin air filters, for optimal filtration, performance and dependability

KEY FEATURES AND BENEFITS

- Manufactured with top quality filtration media
- Designed to Original Equipment specifications, for fit, form and function for vehicles equipped with cabin air filtration systems
- Available in carbon and electrostatic media depending on application
- Include components as per application requirements
- Tested at factory as well as external testing facilities to ensure optimal quality and filtration

ADVANTAGE FUEL FILTERS DIESEL AND GAS

Easy to install high quality Fuel Filters providing optimal filtration and ensuring performance and dependability

KEY FEATURES AND BENEFITS

- Designed to Original Equipment specifications for fit, form and function ensuring easy installation and long dependable performance
- Diesel fuel filters use high efficiency glass media to ensure premium filtration as per the application
- Filter removes even the smallest particles of rust, scale, dirt and water to protect and extend the life and performance of the engine
- Includes a fuel water separator, where required by the application
- Base construction made of stainless steel, dichromate or plastic material that matches or exceeds specifications
