GM OE COMPLETE GASKET KITS

**INTAKE MANIFOLD
GASKET KIT**

**CYLINDER HEAD
GASKET KIT**

**CYLINDER HEAD GASKET KIT
INCLUDING BOLTS WITH RUBBER SEALS**

INTRODUCING NEWLY RELEASED ACDelco PRODUCT

ACDelco is proud to make General Motors Original Equipment (GM OE) Complete Gasket Kits available for purchase by ACDelco customers. These high quality GM OE Complete Gasket Kits are made to provide the same performance, durability and service life you expect from General Motors, and include what is needed to do the job.

ACDelco GASKET KITS

- ⊕ Use a variety of the correct materials in the manufacturing process for proper function
- ⊕ Includes new manifold bolts where required
- ⊕ Includes GM engineering approved Installation instructions
- ⊕ Instructions include a picture of the gasket and lists the entire contents
- ⊕ Where required, bolts have integrated rubber seals making them durable and easy to install

Fel-Pro Gasket Kits

- ⊖ Use material they think will work in the application
- ⊖ Manifold bolts are not included where required—you purchase bolts separately
- ⊖ Clarity of instructions varies based on the origin of the kit manufacturer
- ⊖ Pictures and contents of instructions vary
- ⊖ Only rubber seals are supplied where required, which makes bolts more difficult to reinstall once they are removed

This new line of GM OE Gasket Kits offers the coverage that will fit your customers' vehicles. The Engine Intake Manifold Gasket Sets and the Engine Cylinder Head Gasket Kits offer manifold bolts where required—unlike Fel-Pro Gasket kits. The kits also include GM engineering approved installation instructions with pictures to make replacement even easier. ACDelco GM OE can save you time and makes it simple.

Signs of Wear

Engine Intake Manifold Gasket Set

Service engine intake manifold gasket when signs of wear or failure are displayed, such as:

- **Engine misfire**
- **Overheated engine**

Engine Cylinder Head Gasket Kit

Service engine cylinder head gasket when signs of wear or failure are displayed, such as:

- **Engine misfire**
- **Overheated engine**
- **Leaking coolant**
- **Coolant mixing with oil**
