Product Description:

GM OE DEXRON-VI Automatic Transmission Fluid is the most recent release in the well-established DEXRON series of automotive transmission fluids. It provides consistent shift performance, even in extreme conditions. DEXRON-VI Automatic Transmission Fluid is suitable for use in vehicles that specify the following requirements: fully licensed and approved by GM, recommended for use in GM transmissions model year 2006 and newer calling for DEXRON-VI Automatic Transmission Fluid (replaces DEXRON-III and DEXRON-II(E), or recommended for any other vehicle manufacturer that calls for DEXRON-VI, III, or II(E). GM OE DEXRON-VI Automatic Transmission Fluid is not for use in CVT (Continuously Variable Transmissions) or DCT (Dual Clutch Transmissions) which require specialized fluids.

Features and Benefits:

- Extended fluid life.
- Improved oxidation and thermal stability.
- Optimized frictional properties that provide smooth gear shifting during low-temperature operation and help prevent transmission vibration.
- Outstanding resistance against sludge and deposit formation.
- Improved anti-wear protection which contributes to extended transmission life.
- Outstanding low-temperature performance.

Applications:

ACDelco DEXRON-VI Automatic Transmission Fluid provides warranty protection for 2006 and newer GM vehicles.

Properties	
Kinematic Viscosity cSt @ 40°C	305
Kinematic Viscosity cSt @ 100°C	5.9
Brookfield Viscosity cP @ -40°C	11,500
Viscosity Index	145
Flash Point, COC °C (°F)	220 (428)
Gravity, API	35.76
Color	Red
