Learning Management System

ACDelco's Learning Management System (LMS) offers single source access for training 24/7.

What is it?

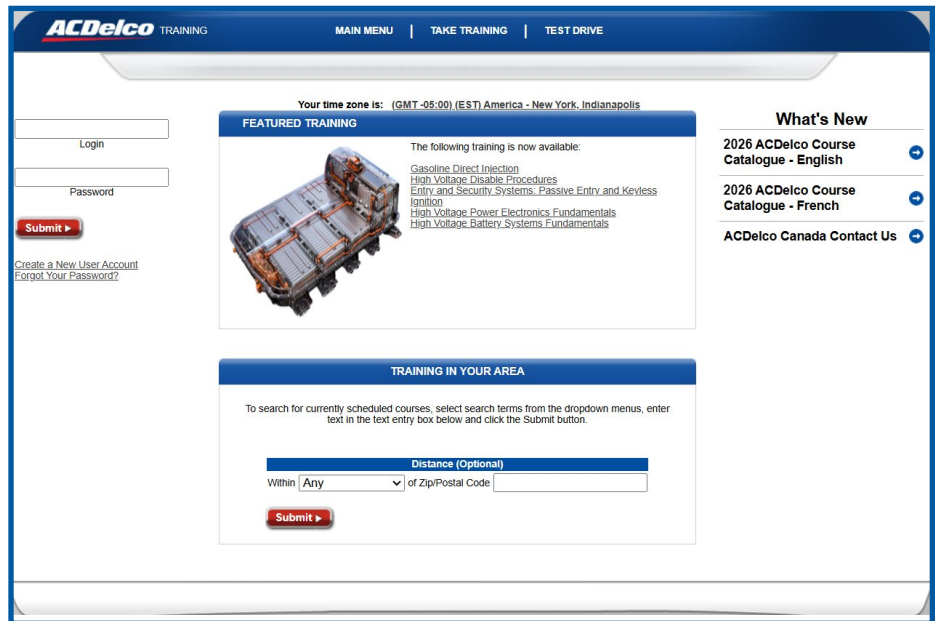

The ACDelco LMS delivers a global, single point of access for training for all personnel. The LMS is an easy-to-use, web-based application that streamlines the delivery and administration of the training program. Its many features reduce overall training costs and maximize employee time on the job.

What can it do?

- Offers a web-based, single point of access to training courses and student history
- Contains simple navigation that flattens the learning curve for Web-Based Training (WBT)
- Permits access to comprehensive training materials
- Tracks learner progress
- Ensures security of data

The ACDelco LMS enhances the ability to improve organizational skills and performance, without reducing employee productivity. It provides the strong foundation needed for any learning program.

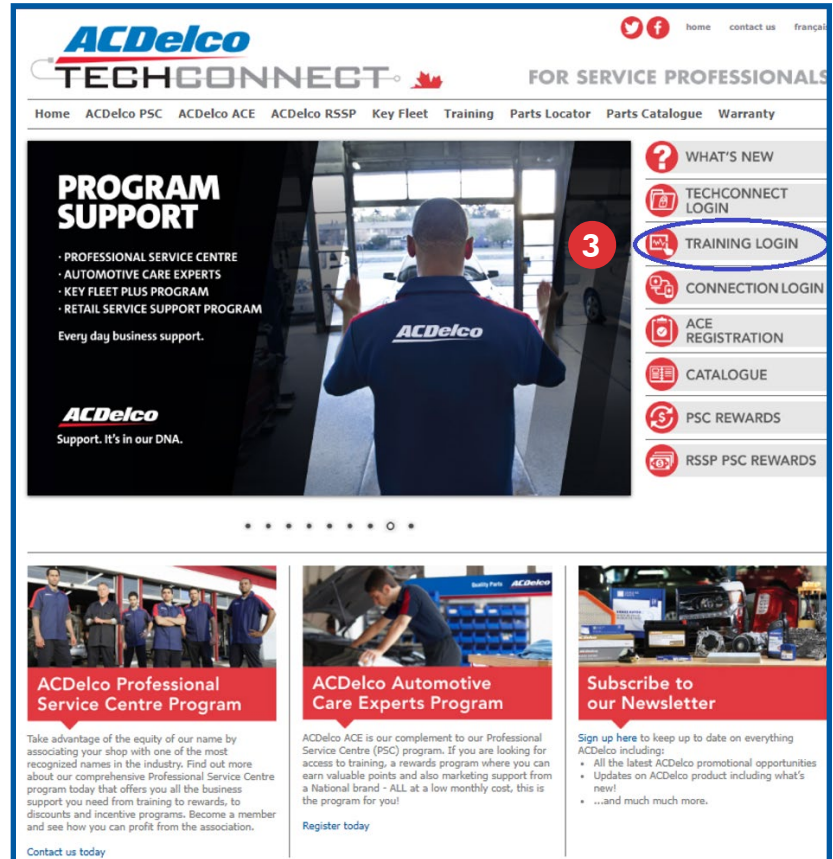

If you have any questions or would like any additional information, contact your ACDelco Representative or the Help Desk at (800) 825-5886, prompt 3, then 1, then 4.

Access the ACDelco LMS:

1. Open your Internet browser
2. Type the following into your address bar:
techconnectcanada.com
3. Click on the Training Login

Tip:

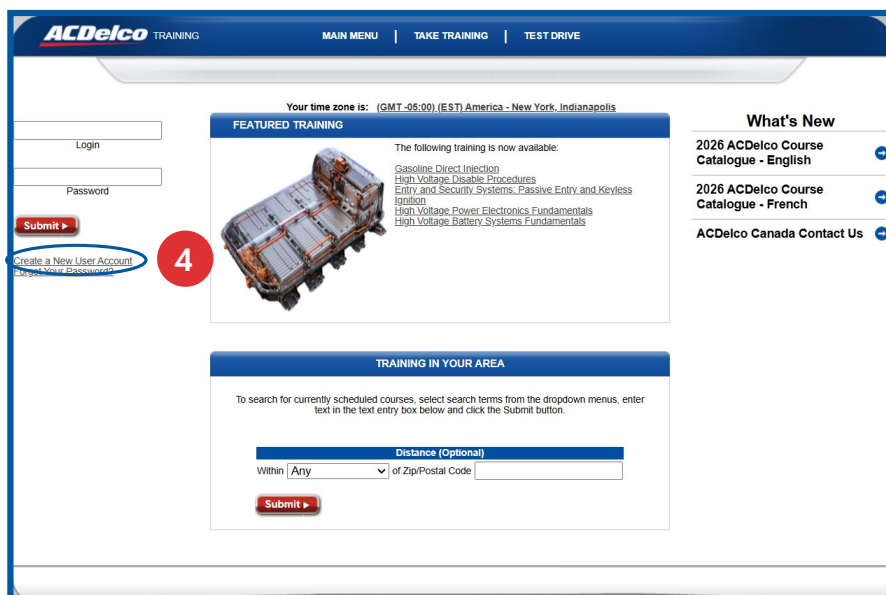

If you are an ACDelco program member, you must know your six-digit account number to register. If you don't know it, ask your manager or ACDelco rep.

Arrive at the ACDelco LMS login page.

Create an Account:

4. Click on **Create a New User Account**.

5. Complete the New User form.

ACDelco TRAINING MAIN MENU | TAKE TRAINING | TEST DRIVE

New User 5

If you require assistance: Contact the Help Desk between 8 AM and 5 PM EST. For Canada dial 1-800-26-Delco or send inquiries to the ACDelco Help Desk at ACDelco.Learning@TrainingSupportAdmin.com

Please select a Province and enter an Organization Code.
NOTE: The Province you select must match the Organization Code you enter!

Province:

Organization Code/Account Number *:

Last Name *:

First Name *:

Middle Name:

Every user must select a unique Login ID. It should be between 6 and 15 characters long and contain only alpha (A-Z, a-z) or numeric (0-9) characters.

Login ID *:

Please provide a valid email address. Training notifications will be sent to this email address. Click [here](#) for help checking your spam filter settings.

E-mail *:

Confirm E-mail *:

Preferred Language *:

Training Path *:

Time Zone *:

Automatically Adjust for Daylight Savings *: Yes No

Date Format *:

6

©2005 - 2023 General Motors. All Right Reserved Privacy Statement

6. Click **Submit**.**Tip:**

After registering, you will be prompted to change your password right away. Remember to write down your log-in ID!

7. The system will generate a password for you, but you will be prompted to change it.
8. Create a new password.
9. Select and answer 2 security questions.

10. Read the Personal Information statement.

11. Select I consent or I do not consent.

- Selecting I consent completes the User Application and automatically logs you in to the LMS.
- Selecting I do not consent will cancel the New User Account application.

Your time zone is: (GMT -08:00) (PST) America - Los Angeles

Please change your password. Your password should be 6 to 10 characters long and contain a combination of letters and numbers. Apostrophes and special characters are not allowed in any of the fields.

All fields required.

New Password: 8

Confirm New Password:

Please enter two questions and answers below to allow you to reset your password in the future. Do not use apostrophes or special characters.

Question 1: (Select One)

Answer 1:

Question 2: (Select One) 9

Answer 2:

Before you provide your personal information, please read the text below.

I understand that the information I provide on this website, including but not limited to, my name, employer, email address, information about courses I take such as course name and results achieved, and survey information that may include my opinions and observations (hereafter "Personal Information"), will be made available to General Motors Corporation ("GM") and its various related entities and may be /made available to the GM business entity in your country, (hereafter "GM Entities"). I further understand that my Personal Information may also be disclosed to suppliers of GM Entities, but solely for the purpose of providing services related to my use of this website. I am aware that GM Entities and their suppliers are domiciled in various countries, many of which do not have the same data protection laws as those of my country.

GM has informed me that:

10

- My Personal Information will be used by GM Entities for business purposes only and, unless required by applicable law, will not be made available to any third party for its independent use;
- GM Entities will exercise due care with respect to the security of my Personal Information; and
- I may access my Personal Information in accordance with applicable law and established procedures for the purposes of updating, correcting, or deleting it by contacting the ACDELco Help Desk.

Based on the above, I explicitly consent to the collection, transfer, storage and use of my Personal Information by selecting "I consent" below. I recognize that if I select "I do not consent" I will be unable to access courses and other training materials through this website and will have to contact the ACDELco Help Desk for any available alternatives.

(Please address any questions or concerns about this to ACDELco Help Desk)

ACDelco Training Approach

ACDelco's approach to training combines a variety of proven training delivery methods to ensure the maximum learning benefit for the service professional. In addition to traditional instructor-led technical training courses, a wide selection of online courses are also available. Online courses offer the latest available business & technical updates right at your fingertips.

Descriptions of the various delivery methods are detailed below.

Online Training

Each course is available to program members only. To join the ACDelco banner program visit Techconnectcanada.ca or contact your ACDelco representative for more information.

PRODUCT LITE TECHNICAL TRAINING courses are downloadable packets of technical information that can typically be reviewed in less than one hour. These guides are intended to help participants understand the technical aspect of various vehicle systems. Participants have the option to complete a test once material has been reviewed to receive credit for the course.

WEB-BASED TRAINING courses range from 1-2 hours in length. Content is presented through voiceover narration, on-screen text, graphics, animations and videos. Technicians are tested on their progress frequently by completing activities and tests.

VIDEO ON DEMAND courses offer technicians the ability to view previously recorded content at any time. These videos are searchable, include the ability to navigate through specific topics, and are now compatible with mobile phones and tablet devices.

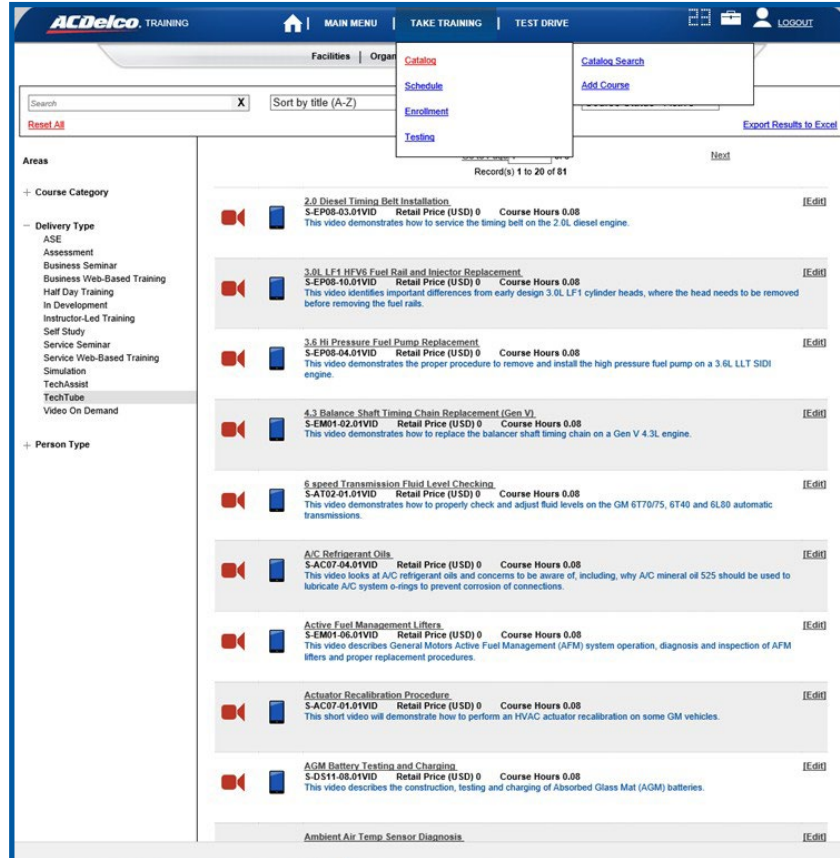

TECHTUBE VIDEOS are short videos that focus on specific diagnostic procedures. Typically 3-7 minutes in length, these brief instructional videos offer a quick and convenient way to view various topics of instructional interest.

Courseware pricing is dependent upon program participation. Contact your ACDelco representative or visit techconnectcanada.com for more information.

Searching for Courses

To search for courses, click on the **TAKE TRAINING** menu, and then **Catalog > Catalog Search**. Use the menu on the left to search for courses by Category, Delivery Type, or Person Type.

If you are not a current user or need help with your user ID and password, contact **your local Technical Services Manager** between 8:00 a.m. and 5:00 p.m. (EST).

Product Lite Technical Training

Product Lite Technical Training courses are interactive downloadable packets of technical information that can typically be reviewed in less than one hour. These guides are intended to help participants understand the technical aspect of various vehicle systems. After reviewing the information, participants may receive credit for the course by completing a test.

ACDelco Engine Cooling Operation

Course Introduction | Engine Cooling Operation | Hybrid Engine Cooling System | Service / Maintenance Overview

Coolant Recovery Tank | Water Pump | Thermostat | Cooling Fans

Coolant Recovery Tank

As coolant is heated, it expands and gains volume—this fluid expansion has to go somewhere. This is handled three ways on various vehicles. The first way is to have the pressure cap located on the radiator and the filler neck connected by a hose to the coolant recovery bottle. The expansion space is the top of the radiator, known as the header tank. If there is insufficient air space, the pressure cap lifts allowing excess pressure and coolant out to the recovery bottle. The second adds a surge or expansion tank to the system. It still has a pressure cap but it can be located on the surge / expansion tank, and a recovery bottle is connected by hose to the filler neck of the pressure cap. This moves the expansion space from the radiator to the surge / expansion tank, and the recovery bottle to hold surplus coolant. When the coolant cools, the pressure in the system can drop below atmospheric pressure. On vehicles with a recovery tank, the pressure cap will draw coolant into the cooling system. The third is to have a larger expansion / surge tank with a pressure cap. These typically do not have the recovery bottles. Generally, the surge / expansion / recovery bottles are constructed out of plastic.

Figure 2-11, Coolant Recovery Tank

1. Expansion Tank Cap (not pressurized) 2. Radiator Pressure Cap 3. Filler Neck 4. Transfer Tube
5. Expansion Tank 6. Coolant Recovery 7. Coolant System Pressurized Cap (no cap in radiator)

Figure 2-12, Coolant Recovery Tank Components

Engine Cooling System

ACDelco Engine Cooling Operation

Course Introduction | Engine Cooling Operation | Hybrid Engine Cooling System | Service / Maintenance Overview

Mechanical Cooling Fans | Electric / Electronic Cooling Fans | Heater Core | Valves

Mechanical Cooling Fans

Mechanical cooling fans consist of a fan and thermal clutch which uses a viscous silicone fluid. At low and moderate engine speeds, the silicone driving fluid, contained in the fan clutch, transmits power to the fan. At high engine speeds, the fan clutch allows enough slippage to limit maximum fan rpm. The fan clutch limits power loss at high engine speeds and eliminates overcooling and excessive noise.

With a mechanical fan clutch, there should be sufficient air flow to draw and hold a dollar bill against the condenser with the engine at normal operating temperature and idle. To perform this test, verify that the condenser and radiator are not plugged, and all fan shrouds and seals are in place. If the air flow is not sufficient to hold the dollar bill, the fan clutch is not working properly.

1. Fan Clutch 2. Cooling Fan

Figure 2-20, Mechanical Cooling Fan

Engine Cooling System

Web-Based Training

Web-Based Training courses are typically 1-2 hours in length. Content is presented through voiceover narration, on-screen text, graphics, animations and videos. Technicians are tested on their progress frequently by completing activities and tests.

☰ Diesel Engine Performance 4: Emission Systems HELP

ACDelco Introduction | 3 of 64

Course Introduction

This course covers the diesel emission system as well as the crankcase ventilation systems.

The content covers the following topic areas:

- Diesel engine aftertreatment emission system's components and configurations
- Regeneration process of the diesel emission aftertreatment system
- Methods of diagnosing the diesel emission system
- Components and configurations of the crankcase ventilation system

You must pass the assessment at the end of the course to receive completed status. Always consult Service Information for correct procedures and specifications.

Note: Accessing this course via tablet may require additional scrolling in order to access navigation controls.

|| ◀ PREV NEXT >

Video On Demand

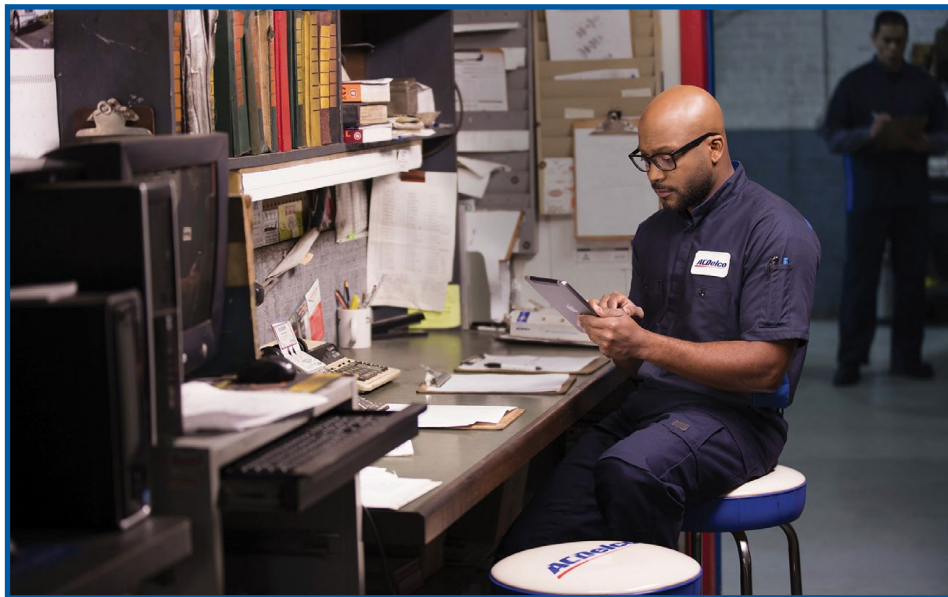

Video On Demand (VOD) allows technicians to review previously recorded content on the Learning Management System (LMS) at any time. VOD courses include component specific overviews and service information.

TechTube Videos

ACDelco TechTube videos are short, vignette-style videos (typically 3-7 minutes) that are focused on specific technical procedures. These brief instructional videos offer a quick and convenient way to view various topics of instructional interest and value. Browse for videos today by accessing the training catalogue on techconnectcanada.com.

TechTubes are also tablet compatible!

Emerging Issues

These Video On Demand courses are monthly Service Know-How Seminars that provide service and technical information on current issues and GM certified repairs. In many cases, an Emerging Issues seminar may provide notification to technicians of a common service concern and the attempts to address the related issues.

During each 60-minute session, current GM service bulletins and warranty issues will be highlighted for technical awareness. Each session will feature a major service topic, supported by GM engineering and service experts. Regular segments include:

- Top Stories
- Featured Topic
- What's Hot for Cars and Trucks
- Powertrain
- Back to Basics
- Fix it Right the First Time
